

Come put your military training and experience to good use. Alliant Technologies is a leading Network Infrastructure and Cloud based Managed Services Company in the metropolitan New York/New Jersey area. In our new state of the art Network Operations Center, we offer our employees the opportunity to work with a revolutionary suite of services that make infrastructure technology simple & easy to consume for our clients. We have built and are continually improving our automated ITSM platform, which provides our customers with a self-service platform that gives them unprecedented levels of control choices and co-management. Our services are primarily cloud based, and include proactive configuration management, network monitoring and reporting, cloud based backup, repair, and Tier 1, 2 and 3 support for network, datacenter and UC services. Alliant is dedicated to developing long-term strategic technical business solutions for mid- sized & enterprise companies.

We currently have openings for Senior Engineers. You must be able to work in a disciplined, process oriented environment. Attention to detail is a must. This is a fast-paced, challenging technical position where no two days are alike. You must have at least seven year's technical experience designing, implementing or assisting with IT projects in the areas of Cisco networking, Cisco VoIP, Microsoft Active Directory, Microsoft Exchange, VMware or NetApp. You will assist with the design and implementation of customer networking environments. You will be responsible for complex analysis of all systems, including hardware, operating systems, software, and connectivity to the network. You will utilize software and hardware tools, identify and diagnose problems and factors affecting system performance. You will provide high-level support to more junior engineers. You will participate in pre and post-sales meetings with clients determining project scope and technical options and requirements. You may be assigned to multiple clients at one time.

We offer a very attractive compensation and benefits package, including medical, dental, disability and life insurance, flexible spending and a 401(k) plan. We are an EEO employer. We are not a recruiter or contract placement firm.

Requirements

- At least six year's technical project management experience designing, implementing or assisting with projects such as the implementation of Cisco networks, Cisco VoIP installations, Microsoft servers, Active Directory, Exchange, VMWare or NetApp.
- In depth knowledge of one of the following disciplines: R&S, Security, Wireless, Unified Communications, or Virtualization.
- Recent certifications such as CCNA, CCNP, MCTIP would be highly valued.
- Ability to follow documented processes and procedures.
- Strong written and verbal communication skills.
- Must be comfortable discussing and presenting complex technical subjects with CIO-level IT management. Must be able to present the companies' products and services to clients in pre-sales meetings and help to close business.
- College degree required.
- CCNP or other advanced certifications preferred.
- Superior time management skills working in a fast-paced environment.
- Ability to work well independently under pressure.
- A bright, energetic & positive outlook.
- A great sense of humor.
- Good organization & planning skills.
- Someone who wants to be a member of a team made up of talented, passionate engineers, and who enjoys helping build upon each others' success

Salary range: \$81k to \$100K
