

Come put your military training and experience to good use. Alliant Technologies is a leading Network Infrastructure and Cloud based Managed Services Company in the metropolitan New York/New Jersey area. In our new state of the art Network Operations Center, we offer our employees the opportunity to work with a revolutionary suite of services that make infrastructure technology simple & easy to consume for our clients. We have built and are continually improving our automated ITSM platform, which provides our customers with a self-service platform that gives them unprecedented levels of control choices and co-management. Our services are primarily cloud based, and include proactive configuration management, network monitoring and reporting, cloud based backup, repair, and Tier 1, 2 and 3 support for network, datacenter and UC services. Alliant is dedicated to developing long-term strategic technical business solutions for mid- sized & enterprise companies.

We currently have openings for Technical Architects. We are looking for individuals who can work in a structured, demanding process oriented environment. This is a fast-paced, challenging technical position where no two days are alike. You must have at least seven year's technical experience designing or implementing IT projects in the areas of Cisco networking, Cisco VoIP, Microsoft Active Directory, Microsoft Exchange, VMware or NetApp. You will be responsible for providing guidance and assistance to account teams in building solutions to address specific customer business needs. You will work as a technology expert to architect Enterprise Networking, Unified Communication or Data Center solutions. You will provide leadership and execution in respective area(s) of expertise to support Alliant's consulting portfolio and execution strategy. You may be assigned to multiple clients at one time.

We offer a very attractive compensation and benefits package, including medical, dental, disability and life insurance, flexible spending and a 401(k) plan. We are an EEO employer. We are not a recruiter or contract placement firm.

Requirements

- At least seven year's technical project management experience designing, implementing or assisting with projects such as the implementation of Cisco networks, Cisco VoIP, Microsoft servers, Active Directory, Exchange, VMWare or NetApp.
- In depth knowledge of one of the following disciplines: R&S, Security, Wireless, Unified Communications, or Virtualization.
- Recent technical certifications such as CCNP, CCDP, CCIE, MCTIP highly valued.
- Strong written and verbal communication skills.
- Must be comfortable discussing and presenting complex technical subjects with CIO-level IT management. Must be able to present the companies' products and services to clients in pre-sales meetings and help to close business.
- College degree required.
- CCIE or other advanced certifications preferred.
- Superior time management skills working in a fast-paced environment.
- Ability to work well independently under pressure.
- A bright, energetic & positive outlook.
- A great sense of humor.
- Strong discipline with good organization & planning skills.
- Someone who wants to be a member of a team made up of talented, passionate engineers, and who enjoys helping build upon each others' success

Salary range: \$100k to \$125K
